Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 2/24/2003. These drawings are approved to the extent as corrected.
2. The drawings are still objected to because Fig 9 appears to include a typographical error. Specifically, the order of the bottom two layers 3b, 3c is not consistent with that of the upper layers 3, and pages 21-22 of the specification appear to indicate that one of the two layers 3b and 3c immediately adjacent the InP substrate 4 should alternatively be labeled as 3a. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2815

4. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Svilans, USP# 6,222,200 (previously made of record in the previous Office Action). Svilans discloses photodetectors with an active layer having alternating compressive-strained and tensile strained InGaAs layers arranged so that the total effective strain of the active region is balanced and capable of operating in a wide wavelength range, covering a wide range of temperatures (e.g., ABSTRACT).

a. Note, for example, the embodiment of FIGs 1 and 2 wherein the active layer 16 comprises 15 cycles (col 4, lines 45-) of 80-nm, 0.25%-compressive-strained In._{0.57}Ga._{0.43}As layers and 20 nm, 1.03%-tensile-strained In._{0.385}Ga._{0.615}As layers formed on an n-doped InP substrate 12 (col. 4, line 44). The strains and thicknesses satisfy the equation that is set forth in various claims such as claim 4.

b. Regarding claims 11-15, FIGs 7a-c depict the associated discussion set forth at col. 8 relating to the optional use of step-grading or continuous grading layers between the first and second layers.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2815

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
